

# Noticing Nature in the Woods

There is so much to notice in the woods. Sometimes, sitting quietly in one spot can help you notice more things. Try it today! Can you notice...

<p><b>A spider web</b></p>  <p>Where is the spider? Why did it build its web here?</p>	<p><b>Signs of nest building</b></p>  <p>What animal built the nest? Can you find it?</p>	<p><b>A tree with flowers</b></p>  <p>Do the flowers have a smell? Why or why not?</p>
<p><b>A pond or puddle of water</b></p>  <p>Look closely. Can you find anything alive in or around the water?</p>	<p><b>Three kinds of birds</b></p>  <p>How can you tell the birds are different kinds? What kinds might they be?</p>	<p><b>Skunk cabbage</b></p>  <p>Why do you think this plant is called skunk cabbage? Test your idea!</p>
<p><b>Tracks</b></p>  <p>What do you think made the tracks? Can you follow the path of the tracks?</p>	<p><b>A plant with thorns</b></p>  <p>Can you find plants with different shaped thorns? Why do they have thorns?</p>	<p><b>A woodpecker hole</b></p>  <p>Why might a woodpecker make a hole? Can you think of more than one reason?</p>
